Education

B.Tech in Computer Science Engineering 2024 – 2028
BML Munjal University, Haryana CGPA: 7.87

Skills

Programming Languages: Python, C++, Java, JavaScript, SQL
Frameworks & Libraries: Streamlit, Node.js, Next.js, MongoDB, Prophet, yfinance, FastAPI, Tailwind CSS, Vite
Databases & Tools: MySQL, MongoDB, Git, Docker, Linux, Firebase
Concepts: OOP, REST APIs, Machine Learning , Data Structures , Algorithms, WebSockets
AI/ML: Groq API, LLM Integration, Time-Series Forecasting, Sentiment Analysis, Whisper STT

Projects

PsyTrace - AI Therapist Feb 2026 - April 2026 — Demo
Tech : Next.js, Node.js, MongoDB, Groq API, Inngest JWT
- Architected a full-stack AI application using FastAPI, PostgreSQL, and JavaScript for real-time emotion analysis.
- Integrated Llama3-70B via Groq with a multi-step Inngest pipeline — each message triggers sequential emotion extraction, memory update, and empathetic response generation
- Engineered AI-generated insight summaries that analyze mood trends and behavioral patterns from historical session data

TicketSync - Institutional Complaint Management System June 2024 – July 2024 — Demo
Tech: HTML5, Tailwind CSS, Vanilla JS, Vite, Firebase
- Built a multi-tenant, serverless grievance resolution platform for educational campus workflows serving students and campus administrators.
- Engineered a mobile-friendly Student Portal featuring issue categorization, automated SLA timeline calculations, file upload support, and real-time status tracking.
- Implemented an Admin Executive Dashboard providing live analytics on ticket volume, automated priority escalations, and a departmental accountability matrix.
- Integrated Firebase Authentication and Cloud Firestore using WebSockets for instantaneous data synchronization and Role-Based Access Control (RBAC).

Internship / Training

VentureX *(Tech Intern)* June 2024 - Jul 2024
- Developed and delivered TicketSync, a full-stack, serverless web application to streamline grievance management for educational institutions.
- Collaborated effectively within a team environment, learning team coordination, agile workflows, and managing version control to resolve merge conflicts.

Alumni Association- BML Munjal University *(Technical Intern)* June 2025 - Jul 2025
- Digitized and organized a database of 7000+ alumni records using Python and MySQL to improve data accessibility.
- Designed data management solutions to support alumni engagement initiatives.
